3) Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date 29 March 2004.

5) Notice of Informal Patent Application

6) Other: ____.

Application/Control Number: 10/799,099 Page 2

Art Unit: 2133

Drawings

Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated (per page 21, lines 1-5). See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

Claims 68-75 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. These claims recite steps of a method, but they depend from claims that recite apparatus, therefore it is unclear what statutory class of invention applicant is claiming in claims 68-75.

Allowable Subject Matter

Claims 1-67 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: none of the cited references teach or fairly suggest the simultaneous existence of a turbo decoder and a Viterbi decoder having a common memory as is recited in applicants' independent claims 1, 62 or having at least one portion in common as in applicants' independent claims 31 and 63.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Subramanian et al. (2002/0015401) teaches a Viterbi block (418) and a turbo decoder block (420) operating in parallel, Loeliger et al. (2003/0026359) teaches alternate sequential or Viterbi decoder of a convolutional code,

Gavnoudias et al. (2003/0138030) discloses, in Fig. 7, turbo decoder 158 and Viterbi decoder 160, Takayama et al. (2004/0174848) teaches a Viterbi/turbo decoder 112, Box et al. (2004/0243908) discloses in paragraph [0005] a node which includes an execution unit configured to perform a number of bit-oriented functions for example, Viterbi decoding, turbo decoding and Yamanaka et al. (2006/0003795) teaches a decoder configurable as either a Viterbi or a Turbo decoder

Any inquiry concerning this communication or earlier communications from the examiner should be directed to R. Stephen Dildine whose telephone number is (571) 272-3820. The examiner can normally be reached on M - F 5:30 am to 2:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Albert Decady can be reached on (571) 272-3819. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
